

**TREETOP MULTI STRATEGIES BALANCED (EUR)**

**A SUB-FUND OF TREETOP SICAV - MANAGED BY TREETOP ASSET MANAGEMENT S.A., A MANAGEMENT COMPANY UNDER LUXEMBOURG LAW**

The present marketing communication on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Information Document (KID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

**FUND OBJECTIVE, STRATEGY AND RISKS (Class A EUR)**

The product aims to provide shareholders with exposure to various asset classes indirectly through investments in units or shares of undertakings for collective investment.

Under normal market conditions, the product's portfolio mainly consists of shares of undertakings for collective investment with variable capital ("UCI"). The product may invest up to 60% of its net assets in shares of undertakings for collective investment investing mainly in shares and/or other securities giving access to the capital of companies to global developed and emerging markets (the "Global Equity Component of the Portfolio"). Up to 50% of the product's net assets may be invested in shares of undertakings for collective investment primarily investing in bonds, money market instruments or bank deposits (the "Fixed-Income Instrument Component of the Portfolio"). The Global Equity Component of the portfolio may invest in shares of undertakings for collective investment managed or promoted by the Treetop Asset Management S.A. or its affiliates, including in other products of the SICAV. Within this component, the product will invest in UCI shares by seeking diversification in management styles (active or passive), economic sectors and geographic areas. The Fixed-Income Instrument Component of the portfolio will favour shares of undertakings for collective investment managed by third parties.

The product is actively managed without referring to any stock market indices. You can request the redemption of your shares every bank working day in Brussels, the redemption operations are carried out on a daily basis, subject to the limitations outlined in the prospectus and the articles of association.

The product does not distribute dividends (which means that the income generated by the product is added to the share price). The product is aimed at individuals or legal entities wishing to invest for the long term (we recommend an investment horizon of 4 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio. These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID. The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This indicator assesses potential losses in future returns at a medium-low level, and it is unlikely that poor market conditions will affect the value of the shares in which the product invests and therefore the value of the product itself. The product is classified in this particular category because through the UCIs it holds in the portfolio, it invests in equities, which are generally riskier than bonds or money market instruments.

Under unusual market conditions, additional risks could arise: credit risk (up to 50% of the portfolio may be invested in shares of UCIs investing mainly in bonds, money market instruments or bank deposits, which are exposed to the risk of default of the issuers of these debts), capital risk (the product is not subject to capital guarantee or capital protection, investors may therefore lose all or part of their capital), sustainability risk (environmental, social or governance event or condition that could cause an important negative impact on the value of an investment), risk associated with external factors (uncertainty relating to certain environmental elements, such as the tax regime), and currency risk (the assets consist mainly of shares of UCIs. Although these shares may be denominated in EUR, the assets held by these UCIs may be denominated in various currencies depending on the markets in which they invest. Fluctuations in exchange rates between the euro and these various currencies will therefore have an influence on the NAV of the product). Please refer to the prospectus for more details. This product does not include any protection from future market performance so you could lose some or all of your investment.

**PERFORMANCE AND NAV EVOLUTION (Class A EUR)**

**NAV evolution of Treetop Multi Strategies Balanced A since inception**

**Performance summary**  
As of 30 September 2025

	Treetop Multi Strategies Balanced A
<b>Dumulated returns</b>	
September	1.8%

\* Some UCIs are not offered to the public in Belgium. Please consult your financial advisor for more information.

(1) **Active management** is based on one or more professionals to manage a fund portfolio according to their convictions. These convictions are based on analyses and research that they carry out in order to identify the investments that seem to be the most promising in order to outperform the market reference of the managed portfolio

(2) The objective of **passive management** is to replicate, as closely as possible, the performance of a benchmark index. The chosen benchmark comprising many components, passive management provides access to a broadly diversified portfolio
