Lower risk — Higher risk

For further information on the risks and the risk indicator of the fund, please refer to the latest KID and prospectus.

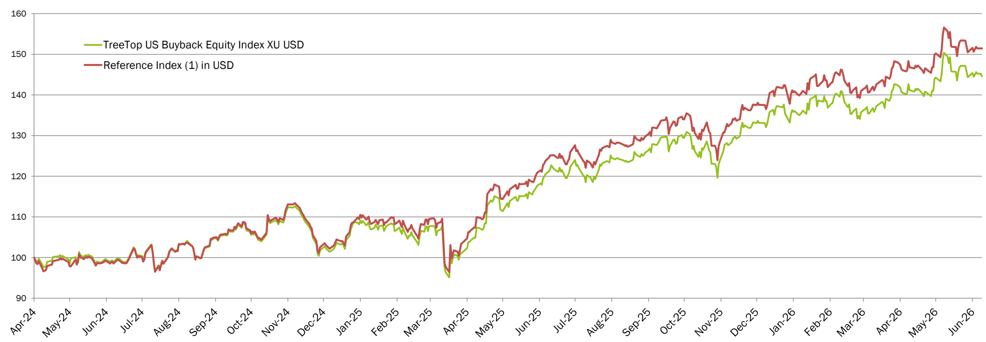
FUND OBJECTIVE, STRATEGY AND RISKS (Class XU USD)

The product aims to increase the value of your investment over the long term by passively replicating the S&P 500 Buyback FCF Index.
Under normal market conditions, the product will seek to achieve its objective by closely replicating, through a passive portfolio management, the composition of the S&P 500 Buyback FCF Index ("the Index"). The Index is an equity index, calculated and published by S&P Dow Jones Indices LLC, composed of stocks of 30 large US companies which are characterized by: (i) a high buyback ratio, (ii) high liquidity and (iii) a high free cash flow yield. The exposure to the Index will be achieved primarily through a physical replication by investing directly in the securities comprising the Index in a proportion that is close to their proportion in the Index. The composition of the Index is reviewed quarterly. The product aims to achieve a tracking error between the product and its index that will normally not exceed 1.5%.
You can request the redemption of your units on any bank business day in Brussels. Redemption orders are processed on a daily basis, subject to the limitations provided for in the prospectus and the articles of association.
This product does not distribute dividends (which means that the income generated is added to the price of the product).
The product is aimed for the general public, i.e., individuals or legal entities wishing to invest for the long term (we recommend an investment horizon of 6 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio.
These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID.
The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this product as 4 out of 7, which is a medium risk class. This indicator assesses potential losses in future returns at a medium level, and poor market conditions could affect the value of the shares in which the product invests and therefore the value of the product itself.
This level of risk reflects the fact that the product invests in shares which are more volatile than bonds or money market instruments.
Under unusual market conditions, additional risks could arise: sustainability risk (environmental, social or governance event or condition that could cause an important negative impact on the value of an investment), risk associated with external factors (uncertainty relating to certain environmental elements, such as the tax regime), concentration risk (the index includes only 30 shares of US companies, the value of the investment may experience greater price fluctuations than those of broadly diversified US equity indices) and the currency exchange risk (the product invests in securities denominated in currencies other than that of the product, the risk that the value of an investment may be influenced by exchange rate fluctuations is real). Please refer to the prospectus for more details.
This product does not include any protection from future market performance so you could lose some or all of your investment.

PERFORMANCE AND NAV EVOLUTION (Class XU USD)

NAV evolution of TreeTop US Buyback Equity Index XU USD vs. Reference Index(1) since inception



Performance summary

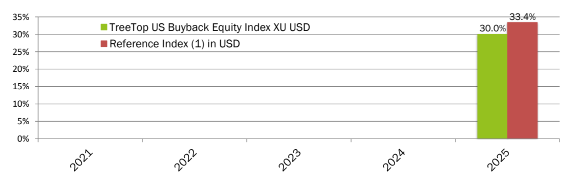
*** Class XU was launched as of 22/04/24*

Calendar year performance of TreeTop US Buyback Equity Index XU USD vs. Reference Index* in EUR since inception

As of 31st December of each year



Source : CACEIS Bank, Belgium Branch and S&P Dow Jones for the period 2024-2026 (basis 100 op 25/03/24).

Past performance and NAV evolution are no guarantee of future performance.
The returns are not calculated in the reference currency (EUR) but in USD (the currency of the class). They do not reflect any entry charges or tax a Belgian private individual might have to pay. ***In addition, the calculated returns may show a difference in performance between the fund and the index due to the difference between the dates on which these values are calculated.***

Other share classes exist (A EUR, AD EUR, P EUR, PD EUR, X EUR and XD EUR), and the relevant returns as well as the net asset value evolution are available on request and free of charge from TreeTop Asset Management and are also presented on our website https://www.treetopam.com/en/funds/treetop-index-funds.

(1) The Reference Index is S&P500 Buyback FCF in USD (Bloomberg code: SPBUYFUT).
