### Risk Indicator

For further information on the risks and the risk indicator of the fund, please refer to the latest KID and prospectus.

# TREETOP SEQUOIA EQUITY (EUR)

SUB-FUND OF TREETOP GLOBAL SICAV - MANAGED BY TREETOP ASSET MANAGEMENT S.A.,  
A MANAGEMENT COMPANY UNDER LUXEMBOURG LAW

The present marketing communication on its own does not give complete information about the SICAV and should therefore be read before any investment together with the Key Information Document (KID), the prospectus as well as the latest annual/semi-annual report of the SICAV.

## FUND OBJECTIVE, STRATEGY AND RISKS (Class AH EUR)

The product aims to increase the value of your investment over the long term.

Under normal market conditions, the product invests primarily in shares of issuers around the world, including emerging markets. It also invests in other types of securities consistent with its investment objective. The product may also use derivatives for investment purposes or to reduce investment risk (hedging). The product invests in a portfolio of approximately 50 stocks and consists mainly of stocks of multinational companies offering a high dividend yield and/or instruments convertible into shares or giving the right to acquire shares of these companies. It invests primarily in mid to large capitalization companies. The manager's objective is to hedge positions in currencies other than EUR representing more than 2.5% of the net asset value of the product.

This product does not distribute dividends (which means that the income generated is added to the price of the product).

You may place orders to buy or sell the product on a daily basis.

The product is aimed at individual investors wishing to invest for the long term (we recommend an investment horizon of 6 years). The investor must have a good knowledge of the risks associated with financial markets and be prepared to accept capital losses due to fluctuations in the value of the assets in the portfolio.

These objectives as well as the investment policy are an exact copy of those indicated in the corresponding KID.

The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset.

The product is actively managed.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This indicator assesses potential losses in future returns at a medium level, and poor market conditions could affect the value of the shares in which the product invests and therefore the value of the product itself. This level of risk reflects the fact that the product invests in a limited number of shares, and may favor particular economic sectors or regions, including emerging markets.

Under unusual market conditions, additional risks could arise: liquidity (convertible bonds may become hard to value or to sell at a desired price and time), counterparty (the product could lose money if any entity with which it does business becomes unwilling or unable to honor its obligations to the product), legal and tax risks (the product could be affected by foreign legal and tax changes, some of which may be retroactive). Please refer to the prospectus for more details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## PERFORMANCE AND NAV EVOLUTION (Class AH EUR)

### NAV evolution of TreeTop Sequoia Equity AH EUR since Inception

### Performance summary

Data as of 30 April 2025

TreeTop Sequoia Equity AH EUR
